

This is a 50 mW diode pumped microchip green laser. It features temperature stabilization of the pump diode and laser crystal for stable operation.

Applications:

Interferometry, holography, Raman spectroscopy, photochemistry, photoluminescence.

Specifications:

<i>Output power (532nm)</i>	<i>50mW</i>
<i>Spatial mode</i>	<i>TM₀₀</i>
<i>Polarization</i>	<i>horizontal</i>
<i>Divergence (full angle)</i>	<i>13 mrad</i>
